COLOR DOPPLER / DUPLEX ULTRASOUND REPORT

Left Lower Limb Arterial Study

Patient Details

Patient Name Sonal Patel
Age / Sex 70 Years / Male
Patient ID 500814

Referral / Exam

Referring Doctor Dr. V. Desai
Examination Date 05-04-2024

Technique

Duplex evaluation of Left lower limb arteries was performed using B-mode, Color and Spectral Doppler imaging. Peak systolic velocities (PSV) and waveform patterns were analyzed in inguinal arterial segments — Common Femoral, Superficial Femoral (SFA), Peroneal and Tibial arteries.

Findings — Left Lower Limb

Artery	PSV (cm/s)	Waveform	Remarks
Common Femoral Artery	84.5	Triphasic	Mild atherosclerotic wall thickening ; Triphasic waveform preserved
Profundus Femoris	77.4	Triphasic	Mild atherosclerotic wall thickening ; Triphasic waveform preserved
Proximal Superficial Femoral Artery	69.4	Triphasic	Reduced amplitude consistent with downstream disease ; Triphasic waveform preserved
Mid SFA	66.3	Triphasic	Reduced amplitude consistent with downstream disease ; Triphasic waveform preserved
Distal SFA	66.2	Triphasic	Reduced amplitude consistent with downstream disease ; Triphasic waveform preserved
Popliteal Artery	59.6	Triphasic	Reduced amplitude consistent with downstream disease ; Triphasic waveform preserved
Peroneal / Posterior Tibial Artery	39.8 / 42.2	Triphasic	Diminished flow / poor distal perfusion ; Triphasic waveform preserved
Anterior Tibial Artery	46.1	Triphasic	Reduced amplitude consistent with downstream disease ; Triphasic waveform preserved

Ankle—Brachial Index (ABI)

ABI: 0.84

Impression

ABI reduced, suggests peripheral arterial disease and warrants correlation with imaging findings. Markedly reduced PSV in Peroneal Artery suggesting severe flow-limiting disease at or proximal to the level(s) described. Triphasic waveforms are largely preserved indicating good distal arterial compliance. Overall findings suggest hemodynamically significant focal disease — recommend vascular surgical/radiological review and correlation with clinical findings.

Dr. S. Mehta
Consultant Vascular Radiologist
